

Marketing Funnel Analysis Dashboard Report

Executive Summary

This report summarizes insights from the marketing funnel dashboard. The dashboard tracks user sessions, product views, cart additions, checkout starts, purchases, revenue, and conversion performance across campaign types, channels, devices, months, and regions.

Key KPIs

Total Sessions: 96K
Product Views: 62K
Added to Cart: 22K
Checkout Started: 13K
Purchases: 7K
Average Order Value: 616
Total Revenue: 13.76M

Insights

- Approximately 64.6% of sessions reached a product view.
- Around 35.5% of product viewers added items to the cart.
- Nearly 59% of carts progressed to checkout.
- Purchase completion from checkout is about 54%.
- Overall session-to-purchase conversion is about 7.3%.
- Discount campaigns generated the highest revenue (~7.0M), followed by New Launch (~4.1M) and Influencer (~2.7M).
- Paid Ads contributed the highest purchase volume, followed by Organic, Social, and Email.
- Mobile users contributed roughly 70% of purchases compared with Desktop (~30%).
- Revenue remained relatively stable across months with a peak around July/September.

Recommendations

1. Continue optimizing Discount campaigns while protecting margins.
2. Increase investment in Paid Ads and Organic acquisition.
3. Reduce cart abandonment using reminders and incentives.
4. Improve checkout UX to increase checkout-to-purchase conversion.
5. Optimize desktop experience while maintaining mobile performance.
6. Monitor monthly campaign performance and adjust budgets dynamically.

Conclusion

The dashboard indicates a healthy acquisition pipeline with opportunities to improve conversion between cart and purchase. Focusing on checkout optimization, campaign efficiency, and remarketing can further increase revenue and conversion rates.
